

Here goes the politicians trying to control what I hear now.. Preserve freedom of speech, XM satellite Radio is a good thing due to the fact I am not tied down haveing to listen to the same music, talk, and other mundane information that the local stations tell me I want to hear. And to tell you the truth the traffic and weather stations are handy due to the fact that since the FCC has limited the number of AM radio station and there operating power in the particular cities covered, the information is likely not heard and I do alot of travelling up and down the eastern seaboard...
